**"Making Your Home PC More User Friendly"**

## Using Ad-Aware SE

Start program by clicking on Ad-Aware Icon located at the desktop or in the Start Bar. Before you scan your computer for spyware with Ad-Aware SE should run Web Update to make sure that you have the latest definition file by clicking on **"check for updates now"** while connected to the Internet

When you see this box click on **"connect"**

**"Making Your Home PC More User Friendly"**

When the updates are completed you will see this dialog box. Click on **"finish"**. You will then return to **"Ad-Aware SE Status"** (the first window you see when you start the program). You can disconnect from the Internet. Now you're ready to perform a system scan.

Click the **"Scan now"** button in the main menu on the left side of the main status screen or use the **"Start"** button in lower right corner. This will open the **"Preparing System Scan"** screen.

**"Making Your Home PC More User Friendly"**

When you see this box, right click in the middle of the box.

You will then see this dialog box

Click on **"Select all objects"**

When all objects have a check mark next to them in the **"Scanning Results"** box, click **"Next"** You will then be asked to delete files from the system, click **"OK"** Once again you will see the **"Ad-Aware SE Status"** box. Close the box and you're done!

Repeat process over until you have no reported object.

Ad-Aware may direct you to restart your system to remove additional spyware components that it was unable to delete in the current session.
